Subject: Microsoft settlement

Would you please end this "going after Microsoft" fiasco. No one forces anyone to do business with Microsoft or like their inventions. They obviously have many talented people in their organization that comes up with technology that people want to spend their money on and I can not see where they are putting anyone else out of business by underhanded schemes. Just save the taxpayers a lot of money and settle this thing once and for all. Let the young and inventive people of this country know that it is okay to go out on a limb and invent and invest in their own ideas.

Mr. and Mrs. Earnest L. Calvert
